

HomeCLEANSE

Your Mold Problem. Finished. Permanently. And Provably.

The HomeCleanse Flagship Money-Back Guarantee

You're not paying us to try. You're paying us to finish and prove it.

The HomeCleanse Guarantee

When HomeCleanse completes a remediation using our standard process:

- + We guarantee the treated areas of your home will pass post-remediation environmental testing conducted by any qualified, independent testing company.
- + If the home does not pass on the first verification, we return and continue remediation at no additional cost.
- + If the home does not pass a second verification, we refund the remediation labor for the affected area.
- + We don't stop when the work is "done." We stop when the problem is resolved and proven.

This is for homeowners who:

- + Want it done right the first time
- + Have health concerns and can't afford uncertainty
- + Have already tried "standard remediation" and are still sick
- + Refuse to gamble on their home or their family again

If you're looking for the cheapest option, we are not it. If you're looking for the last remediation you'll ever need, you're in the right place.

Why We Can Stand Behind This

Most companies can't offer guarantees because they don't control the variables.

We do.

- + Thousands of successful remediations completed, with hundreds performed every year.
- + A 92-step clinical remediation process—over three times more thorough than standard industry protocols.
- + Data-driven execution, verified through pre- and post-remediation testing.
- + No guesswork. No shortcuts. No "hope it worked."

A Second Layer of Protection: Our 10-Year Mold Recurrence Warranty

When HomeCleanse performs remediation using our standard process and HomeCleanse-approved products, we provide:

A 10-Year Warranty Against Mold Recurrence in the treated areas of the home.

This means:

- + If mold returns due to a failure in our remediation work, we address it.
- + No finger-pointing
- + No fine-print escape hatches
- + Just real accountability

No other remediation company in the world backs their work this way—because most can't.
